BLENDER 2.3 3D Software for Modeling, Animation, Rendering

Digital Art Software - production sample

Blender, the open source software for 3D modeling, animation, rendering, post-production, interactive creation and playback (see the features and screenshots); Available for Windows, Linux, Irix, Sun Solaris, or Mac OS X under the GNU Public License. Revolutionary non-overlapping and non-blocking UI delivers unsurpassed workflow. Flexible and fully configurable window layout with as many screen setups as you prefer. Undo support on all levels. Powerful built-in database system allowing instances, scene management, and dynamic linking multiple project files. Anti-aliased fonts with international translation support. Windows for animation curves/keys, outliner, schematic scene diagram, non-linear video sequence editing, character animation action editor, non-linear animation mixer, image/UV editing, file/image selection and file management. Built-in text editor for annotations and editing Python scripts. Blender is being released with source codes under the GNU Public License. Blender therefore is fully free to use and distributes within any educational, professional or commercial environment. Artwork created with Blender - including python scripts - is the sole property of the creator. -- software downloading file size 4.64MB
